

GLOBAL AIRBNB PERFORMANCE ANALYSIS REPORT

Executive Summary

This project analyzes Airbnb's global marketplace performance across 10 major cities using Power BI. The objective was to identify business trends, customer satisfaction patterns, pricing behavior, host performance, and growth opportunities through interactive visual analytics.

Dashboard KPIs

KPI	Value
Total Listings	279,712
Total Hosts	182.024K
Average Rating	93.41
Total Cities	10

Key Findings

Finding 1: Airbnb Experienced Strong Growth Until 2015

Listing creation increased significantly from 2008–2015. Growth slowed during 2016–2017 and resumed in 2018.

Finding 2: Paris, New York, and Sydney Dominate Listings

These cities represent Airbnb's strongest inventory markets.

Finding 3: Hotel Rooms Command the Highest Prices

Guests are willing to pay premium prices for hotel-style accommodations.

Finding 4: Mexico City and Rio de Janeiro Have the Highest Ratings

Customer satisfaction is highest in these cities.

Finding 5: Cleanliness Is the Weakest Service Metric

Cleanliness consistently scores below other service dimensions.

Finding 6: Entire Places Deliver the Best Customer Experience

Entire Place listings achieve the strongest ratings.

Business Recommendations

Recommendation	Expected Outcome
Strengthen Cleanliness Standards	Higher ratings and repeat bookings
Focus Growth Investment on Top Cities	Faster revenue growth
Expand Premium Accommodation Categories	Higher revenue per booking
Replicate Best Practices From Top-Rated Cities	Improved service consistency
Encourage More Entire Place Listings	Higher customer satisfaction

Dashboard Development Methodology

- Step 1: Data Acquisition & Import
- Step 2: Data Cleaning & Transformation
- Step 3: Data Modeling
- Step 4: DAX Measure Development
- Step 5: Dashboard Design & Visualization

Business Value Delivered

The dashboard transformed raw Airbnb operational data into actionable business insights by identifying growth trends, high-performing cities, customer satisfaction drivers, pricing opportunities, and operational improvement areas.
